

2.3 Servlet 注入Spring

demo4.zip
83.98KB

1 servlet 代码:

```
@WebServlet("/servlet")
public class HelloServlet extends HttpServlet{

    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse resp) throws ServletException, IOException {
        System.out.println("<<do get>>");
        doPost(req,resp);
    }

    @Override
    protected void doPost(HttpServletRequest req, HttpServletResponse resp) throws ServletException, IOException {
        System.out.println("<<do post>>");
        PrintWriter pw = resp.getWriter();
        pw.print("hell servlet");
        pw.close();

    }
}
```

2 启动类:

增加了一个servlet扫描注解

```
@ServletComponentScan
@SpringBootApplication
public class Start {

    public static void main(String[] args) {
        SpringApplication.run(Start.class, args);
    }
}
```
